General Plan Implementation

*A good plan goes to waste if it is not implemented.*¹

It is the responsibility of the City to implement the General Plan through its actions. Pursuant to California Government Code § 65103, the City is required to “implement the general plan through actions including, but not limited to, the administration of specific plans and zoning and subdivision ordinances”. After general plan adoption, the planning agency is also required to “investigate and make recommendations to the legislative body regarding reasonable and practical means for implementing the general plan” (California Government Code § 65400).

Implementation of the City’s General Plan utilizes a multi-faceted approach given that San Diego is large and its communities are diverse in terms of land use, natural features and demographics. Community plans are an integral part of the General Plan: designating land uses, meeting housing needs, and providing community-specific policies to guide public and private development. The use of community plans is an accepted way to refine the policies of the General Plan as they apply to a smaller geographic area, and then to implement them by zoning regulations, ordinances, and other discretionary actions.

The General Plan Action Plan

The General Plan delegates responsibility of identifying and monitoring a variety of implementation actions to the General Plan Action Plan (Action Plan). The Action Plan contains broad implementation measures drawing from General Plan policies and implementing plans and programs. The Action Plan goes beyond the typical implementation tools of zoning, subdivisions, and capital improvements to address implementation comprehensively. The eight key implementation actions are the top priority for General Plan implementation. Due to the broad nature of citywide implementation of the General Plan, more detailed information on individual actions will be contained in the responsible departments’ work programs.

Organization

The Action Plan arranges implementation measures consistent with the structure of the General Plan. The action items are organized by each of the plan’s nine elements. (Note: The Housing Element is not included in the Action Plan. Government Code section 65400(B) requires preparation and submittal to the State of an Annual Progress Report on the Housing Element.) Each table of this Action Plan identifies the policies in the corresponding General Plan element.

Changes to the General Plan or Action Plan

Amendments to the General Plan will need to be reviewed with the actions contained within this plan to ensure consistency between the policy direction contained in the General Plan and the implementation measures. As the Action Plan is updated to indicate implementation progress, identify new initiatives for implementation, or to reflect

¹ State General Plan Guidelines, chapter 9

shifting priorities, an amendment to the General Plan will not be required if the action items remain consistent with the General Plan.

Timeframe for implementation

Implementation will be an ongoing process through the 20-30 year planning horizon of the General Plan. The rate at which implementation will occur is dependent on the City's budget. Each of the tables contains ongoing, short-, mid-, and long-term actions associated with the implementation of General Plan policies. Ongoing actions are part of current standard practices or programs. They have no definite completion date. Ongoing actions are included in the Action Plan in order to account for the implementation of each General Plan policy. Short-term actions are those anticipated to be completed within 0-3 years, mid-term actions within 3-5 years, and long-term actions within 5-10 years. The timeframes associated with each action are based on input from the responsible departments. Every effort was made to identify reasonable timeframes for the implementation actions. However, some actions have aggressive timeframes for implementation due to their importance in implementing the General Plan. Additional resources may need to be allocated to meet the specified timeframes for those actions.

Annual Monitoring Report

In order to monitor the progress and effectiveness of General Plan implementation measures, an annual monitoring report will be prepared. It will be used to measure advancement toward specific goals and policies of each element, and to inform decision-makers and the public. The annual report will also be used to develop a longer-term evaluation of the General Plan and to determine the need for updating any element or policy prior to a comprehensive update. Detailed monitoring of implementation actions identified as ongoing actions will not be required. The preparation of the annual progress report will provide the opportunity to evaluate progress on implementation measures and adjust timeframes and priorities as needed.

Funding & the Budget Process

The Action Plan is intended to be an integral part of the City's budget and finance process. During the budget process and formation of the City's financial strategies and plans, the Action Plan will be used as an information tool to identify funding priorities for General Plan implementation.

General Plan Implementation Priorities

Eight key actions have been set as the priority for General Plan implementation. As identified in the table below, these actions are complementary and together form the core of the implementation program. The actions are not prioritized within the table as the actions draw upon separate funding sources or are the responsibility of separate departments or divisions. Each plays a vital role in implementing the vision set forth in the General Plan.

Key General Plan Implementation Actions

Implementation Actions	Responsible Department	Time Frame	Funding
Community Plan Updates	CPCI	Ongoing See discussion below	Variety of Sources Staff funding has been identified to begin the program of plan updates. Additional funding will need to be identified to update community plans on a regular schedule.
Climate Change Initiatives	CPCI/ESD/DSD as lead with participation from other City Departments	Includes ongoing, short-, mid-, and long-term actions	Variety of Sources Dependent upon action
Water Supply & Conservation Efforts	Water Department as lead with participation from other City Departments	Includes ongoing, short-, mid-, and long-term actions	Variety of Sources Dependent upon action
Land Development Code Amendments	CPCI/DSD	Dependent upon specific amendment See specific actions for time frames	General Fund Staffing /Consultant Services Funding will need to be identified to complete all Land Development Code Amendments in the timeframes identified.
Public Facilities Financing Strategy	CPCI	Short-term	Staff resources have been identified.
Economic Development Strategic Plan	CPCI	Short-term	General Fund Staffing Staff funding has been identified.
Parks Master Plan	CPCI	Mid-term	General Fund Staffing/Consultant Services Funding for staffing and consultant services will need to be identified to initiate the Parks Master Plan.
Historic Preservation Incentives	CPCI	Short-term	General Fund Staffing Staff resources have been identified to begin work on this program.

Community Plan Updates

The implementation of the City of Villages land use strategy and refinement of citywide goals and policies as applied to individual communities will be accomplished primarily through the update of the City's community plans. The table below identifies community plans that are in the update process or scheduled to begin in the near future. Additional community plans are also in need of update. As staffing and funding becomes available to begin additional updates or as plan updates identified below are completed, updates of the remaining community plans will commence. A list of community plans and their adoption years are included as an appendix. Plan updates are prioritized in consideration of a number of factors including:

- Funding Availability;
- Opportunities for village development;
- Development pressure manifested through frequent amendment requests;
- Citywide programs that result in a rethinking of land use/circulation patterns, such as Multiple Species Conservation Program (MSCP), Airport Land Use; Compatibility Plan (ALUCP) adoption
- Demographic shifts within a community;
- Outdated policies and recommendations;
- Frequent conflict on interpretation of plan policies and recommendations; and
- Policies not achieving desired effects of the community

Anticipated Schedule of Community Plan Updates

Community Plan	Start Date	Estimated Start of Hearing Process
Otay Mesa	Ongoing	Summer Fall 2009
Ocean Beach	Ongoing	TBD
Barrio Logan	Spring 2008	Winter 2010
Grantville Master Plan ¹	Summer spring 2008	Summer Winter 2010
Uptown, North Park & Golden Hill Cluster	Winter 2009	Fall 2011
Midway-Pacific Coast Highway & Old San Diego	Spring Fall 2009	Spring Fall 2011
San Ysidro	Spring Fall 2009	Spring Fall 2011
Southeastern San Diego ² & Skyline-Paradise Hills	TBD	TBD
Mission Valley	TBD	TBD
Peninsula	TBD	TBD

¹Includes amendments to the Navajo & Tierrasanta Community Plans

²Includes Encanto planning area

Staffing for community plan updates will rely on a combination of planning staff and consultants, depending on the needs and funding availability of each community. Funding for community plan updates will come from a variety of sources including:

- Grants,
- Redevelopment funding,
- The General Fund,
- Contributions from other agencies, and
- Other sources.

Funding from Community Development Block Grants (CBDG) can be used for specific communities when it can be demonstrated that there is a benefit for low- to moderate-income populations. Where possible, community plan updates will be ‘clustered’ in groups of two or three in order to comprehensively analyze issues and impacts. However, each community will maintain its own distinct community plan. The Community Plan Preparation Manual, an administrative document, will help guide the update process.

Community plan updates will provide the opportunity to accomplish short-term as well as long-term General Plan implementation goals. All community plan updates will serve as the vehicle to implement General Plan policies such as identification of village and housing opportunity areas, public facilities adequacy, sustainable development practices, pedestrian environment improvements and open space preservation. While community plans are being updated, there may be instances where the policies of the community plan and General Plan are not fully aligned. However, there are no land use or zoning inconsistencies between the General Plan and any given community plan because the General Plan does not change community plan land use designations. The community plans are the final arbiter on issues of land use, density and intensity. Until such time that the community plans are updated, the General Plan will be used by staff and decision-makers to review and make findings for discretionary development projects in addition to the adopted community plan. Implementation opportunities may occur on a project-by-project basis. Many of the urban design policies are intended to be implemented through this process. A list of policies useful for implementation through project review has been included as an appendix.

Due to the distinctiveness of each community, the plan updates will also provide an opportunity to further refine and implement action items that are especially relevant to each community. Some of the Action Plan items that will be addressed as a part of plan updates currently underway include:

- New and amended industrial zone packages
- New or refined mixed use zoning regulations
- Parking management strategies
- Location and design of villages
- Multi-modal transportation improvements in a built-out community
- Park and recreation equivalencies
- Implementation of collocation, environmental justice, and equitable development policies
- Pedestrian and bicycle linkages within the community and to surrounding neighborhoods and trolley stations
- Implementation of art and culture policies
- Design of Transit-Oriented Development
- Deficiencies and improvements in public infrastructure

Climate Change Initiatives

The General Plan has a strong sustainability focus with specific policies addressing climate change. While climate change is a global problem, local governments can take meaningful actions to reduce local greenhouse gas (GHG) emissions that contribute to climate change and devise specific adaptation strategies to minimize local impacts that could result. The Global Warming Solutions Act of 2006 (AB 32) requires that California reduce its GHG emissions to 1990 levels by 2020. To meet the AB 32 targets locally, the San Diego region would have to reduce its projected emissions by 33%². An even more ambitious long-term reduction target was established by Executive Order S-3-05, signed by Governor Schwarzenegger in 2005, which calls for statewide GHG emissions reductions to 80% below 1990 levels by 2050.

Additionally, Senate Bill (SB) 375 was signed into law in 2008. SB 375 was designed to help achieve the goals of AB 32 by reducing the emissions from cars and light trucks through improved land use and transportation policy. SB 375 requires the establishment of regional targets for GHG emissions and the coordination of regional transportation, housing, and climate change planning, including the creation of a regional Sustainable Communities Strategy. It also provides new streamlining provisions for the California Environmental Quality Act (CEQA) requirements for certain projects. SANDAG is currently working with the state and others provide input into the development of the San Diego region's target, and to incorporate the requirements of SB 375 into the next Regional Transportation Plan update and Regional Housing Needs Assessment process. The City's General Plan is consistent with SB 375's goals to coordinate land use and transportation planning. However, future community plan updates may need to demonstrate consistency with the anticipated regional Sustainable Communities Strategy in order to be eligible for various incentives or funding programs, as well as to address climate change impacts under CEQA. More detailed guidance on SB 375 and AB 32 implementation is still being developed by the state.

It will be very challenging for the City of San Diego as well as the state of California to meet the emission reduction targets. The General Plan Action Plan identifies some steps that the City can take to help meet state and local targets. However, more detailed development and implementation of actions and programs designed to reduce the climate change impacts caused by the community-at-large and the City as an organization will need to be developed through an update of the City's Climate Protection Action Plan and through collaboration with SANDAG and other local organizations and institutions.

Local initiatives addressing climate change include the San Diego County Greenhouse Gas Inventory prepared by the University of San Diego (USD) Energy Policy Initiatives Center (EPIC); the San Diego Regional 2050 Study prepared by the San Diego Foundation; a Regional Climate Action Plan being prepared by SANDAG; and Sustainability Master Plan and Guidelines being prepared by the Centre City Development Corporation (CCDC).

² San Diego County Greenhouse Gas Inventory, University of San Diego, Energy Policy Initiatives Center, 2008.

The USD/EPIC Inventory reports on GHG emissions from 1990 to 2006 using the best available data, and provides estimates of future emissions to 2020. Using emissions reductions targets in AB 32 as a guide, the study also suggested emissions reduction targets and reduction strategies for the region. The study found that nearly 60 percent of total regional emissions are associated with individuals' driving and residential energy consumption. The largest potential GHG emissions reductions are dependent on state actions to implement stricter vehicle emissions, renewable and clean fuels standards. However, local government actions also play a significant role in regional GHG reduction strategies. Potential roles for local government identified by the USD study include: reducing vehicle miles traveled and electricity and natural gas consumption; increasing use of distributed energy resources such as cogeneration and photovoltaics; and making more efficient use of gas from landfills and exploring waste processing technologies that produce fuels. These topics are addressed to varying degrees in the General Plan and General Plan Action Plan, but will require additional staff work and Council adoption of associated implementation measures in order to achieve desired results.

Water Supply & Conservation Efforts

An adequate and reliable water supply is vital for the future of San Diego. This action will cover the multiple efforts by the City to address the water shortage for current and future residents through increasing water supply and promoting conservation. The Water Department is actively pursuing ways to increase our water supplies and our options. This includes maximizing all local alternatives and reaching out to regional partners. The City is committed to leading by example and to conserving water use within every department. A key part of the City's strategy is to promote conservation through education and incentive programs in partnership with the San Diego County Water Authority.

Land Development Code Amendments

Another key component of General Plan implementation will be Land Development Code (LDC) amendments. These amendments will take place as needed to provide zoning packages to implement community plan land use designations and other community-specific recommendations, or to implement specific General Plan policies found in the Land Use and Community Planning, Conservation, Mobility, Economic Prosperity and Urban Design elements. Amendments could take place as part of regular LDC update, as a part of community plan updates, or as stand-alone amendments. The amendments identified throughout the Action Plan have been assigned a timeframe according to priority. Additional funding will need to be identified to provide for staffing or consultant services to accomplish the amendments in the timeframes specified.

Public Facilities Financing Strategy

The financing strategy, which will be prepared as a companion document to the General Plan, will establish a plan of action for providing public facilities within the City of San Diego. The purpose of the strategy is to identify practical financing mechanisms and

reasonable methods for providing currently needed and future public facilities. “Public facilities” include, but are not limited to, the following categories of capital infrastructure improvements: police, fire, library, parks, recreation, open space, transportation, streetscapes, and others. The strategy will provide a context from which to examine the City’s current position and challenges related to financing capital improvements. It is the intent of this strategy to identify *practical* solutions, within realistic timeframes, to effect progress and improve quality of life for City residents. The strategy will be updated periodically as conditions change, new needs arise, and new financing mechanisms become available. Facilities Financing staff has begun work on developing this strategy.

Economic Development Strategic Plan

The Economic Development Strategic Plan will further refine the goals and policies of the Economic Prosperity Element, report on economic trends, describe targeted industry clusters, inform infrastructure and land use priorities, develop strategies for addressing near- to mid-term economic issues, and identify new initiatives for public and private partnership. The Strategic Plan is currently being updated and will be completed with existing staffing.

Parks Master Plan

The Parks Master Plan will be a comprehensive, citywide plan to guide Park and Open Space acquisition, design and development, recreational programs and needed maintenance over the next 20-30 years. The preparation of a Parks Master Plan will require consultant services and funding will need to be allocated to complete this work within timeframe identified.

Historic Preservation Incentives

The Historical Resources Board has established an Incentives Subcommittee to research and evaluate specific incentives, including proposals for a Transfer of Development Rights (TDR) program. The Incentives Subcommittee has begun meeting monthly and will refer specific proposals to the full Board and onto the City Council for implementation. Existing Historical Resources staff will work with the subcommittee to develop the TDR and other programs.
